

NativeTable

```
classDiagram
    class NativeTable {
    }
    class tfliteIfOptionsT["tflite::IfOptionsT"] {
        +then_subgraph_index
        +else_subgraph_index
        +IfOptionsT()
        +IfOptionsT()
    }
    tfliteIfOptionsT --|> NativeTable
```

The diagram illustrates a class hierarchy. At the top is the 'NativeTable' class, represented by a rectangle with three horizontal compartments. The top compartment contains the class name. Below it are two empty compartments. At the bottom is the 'tflite::IfOptionsT' class, represented by a rectangle with three horizontal compartments. The top compartment contains the class name. The middle compartment contains two attributes: '+ then_subgraph_index' and '+ else_subgraph_index'. The bottom compartment contains two methods: '+ IfOptionsT()' and '+ IfOptionsT()'. A blue arrow with an open triangular head points from the 'tflite::IfOptionsT' class to the 'NativeTable' class, indicating that 'NativeTable' inherits from 'tflite::IfOptionsT'.

tflite::IfOptionsT

+ then_subgraph_index
+ else_subgraph_index

+ IfOptionsT()
+ IfOptionsT()
