

NativeTable

```
classDiagram
    class NativeTable {
    }
    class tf_lite_SparseToDenseOptionsT {
        + validate_indices
        + SparseToDenseOptionsT()
        + SparseToDenseOptionsT()
    }
    tf_lite_SparseToDenseOptionsT --|> NativeTable
```

The diagram illustrates a class hierarchy. At the top is the 'NativeTable' class, represented by a rectangle divided into three horizontal sections. The top section contains the class name, while the two bottom sections are empty. Below it is the 'tf-lite::SparseToDenseOptionsT' class, represented by a rectangle divided into three horizontal sections. The top section contains the class name, the middle section contains the method '+ validate\_indices', and the bottom section contains two constructor declarations: '+ SparseToDenseOptionsT()' and '+ SparseToDenseOptionsT()'. A blue arrow with an open triangular head points from the bottom of the 'tf-lite::SparseToDenseOptionsT' class to the bottom of the 'NativeTable' class, indicating that 'tf-lite::SparseToDenseOptionsT' inherits from 'NativeTable'.

tf::lite::SparseToDenseOptionsT

+ validate\_indices

+ SparseToDenseOptionsT()

+ SparseToDenseOptionsT()
