

NativeTable

```
classDiagram
    class NativeTable {
    }
    class tflite_LeakyReluOptionsT {
        + alpha
        + LeakyReluOptionsT()
        + LeakyReluOptionsT()
    }
    tflite_LeakyReluOptionsT --|> NativeTable
```

The diagram illustrates a class hierarchy. At the top is the 'NativeTable' class, represented by a rectangle divided into three horizontal sections. The top section contains the class name. Below it are two empty sections. At the bottom is the 'tflite::LeakyReluOptionsT' class, represented by a rectangle divided into three horizontal sections. The top section contains the class name, the middle section contains '+ alpha', and the bottom section contains two constructor declarations: '+ LeakyReluOptionsT()' and '+ LeakyReluOptionsT()'. A blue arrow with an open triangular head points from the top of the 'tflite::LeakyReluOptionsT' class to the bottom of the 'NativeTable' class, indicating that 'tflite::LeakyReluOptionsT' inherits from 'NativeTable'.

tflite::LeakyReluOptionsT

+ alpha

+ LeakyReluOptionsT()

+ LeakyReluOptionsT()
