

NativeTable

```
classDiagram
    class NativeTable {
    }
    class tf_lite_HashtableFindOptionsT["tf-lite::HashtableFindOptionsT"] {
    }
    tf_lite_HashtableFindOptionsT --|> NativeTable
```

The diagram illustrates a class hierarchy. At the top is the 'NativeTable' class, represented by a rectangle with three horizontal compartments. The top compartment contains the class name, while the two lower compartments are empty. Below it is the 'tf-lite::HashtableFindOptionsT' class, represented by a rectangle with three horizontal compartments. The top compartment contains the class name, the middle compartment is shaded gray and empty, and the bottom compartment is shaded gray and contains two identical method signatures: '+ HashtableFindOptionsT()' and '+ HashtableFindOptionsT()'. A blue arrow with an open triangular head points from the top of the 'tf-lite::HashtableFindOptionsT' class to the bottom of the 'NativeTable' class, indicating that 'tf-lite::HashtableFindOptionsT' inherits from 'NativeTable'.

tf-lite::HashtableFindOptionsT
