

NativeTable

```
classDiagram
    class NativeTable {
    }
    class tf_StridedSliceOptionsT {
        +begin_mask
        +end_mask
        +ellipsis_mask
        +new_axis_mask
        +shrink_axis_mask
        +StridedSliceOptionsT()
        +StridedSliceOptionsT()
    }
    tf_StridedSliceOptionsT --|> NativeTable
```

The diagram illustrates a class hierarchy. At the top is the 'NativeTable' class, represented by a rectangle with three horizontal compartments. The top compartment contains the class name. Below it are two empty compartments. At the bottom is the 'tf::StridedSliceOptionsT' class, represented by a rectangle with three horizontal compartments. The top compartment contains the class name. The middle compartment contains five attributes, each preceded by a '+' sign: 'begin_mask', 'end_mask', 'ellipsis_mask', 'new_axis_mask', and 'shrink_axis_mask'. The bottom compartment contains two methods, each preceded by a '+' sign: 'StridedSliceOptionsT()' and 'StridedSliceOptionsT()'. A blue arrow with an open triangular head points from the 'tf::StridedSliceOptionsT' class to the 'NativeTable' class, indicating inheritance.

tf::StridedSliceOptionsT

+ begin_mask
+ end_mask
+ ellipsis_mask
+ new_axis_mask
+ shrink_axis_mask

+ StridedSliceOptionsT()
+ StridedSliceOptionsT()
