

NativeTable

```
classDiagram
    class NativeTable {
    }
    class tf_ShapeOptionsT["tf::ShapeOptionsT"] {
        + out_type
        + ShapeOptionsT()
        + ShapeOptionsT()
    }
    tf_ShapeOptionsT --|> NativeTable
```

The diagram illustrates a class hierarchy. At the top is the 'NativeTable' class, represented by a rectangle with three horizontal compartments. The top compartment contains the class name. Below it are two empty compartments. At the bottom is the 'tf::ShapeOptionsT' class, represented by a rectangle with three horizontal compartments. The top compartment contains the class name, the middle compartment contains '+ out\_type', and the bottom compartment contains two lines of code: '+ ShapeOptionsT()' and '+ ShapeOptionsT()'. A blue arrow with an open triangular head points from the 'tf::ShapeOptionsT' class to the 'NativeTable' class, indicating inheritance.

tf::ShapeOptionsT

+ out\_type

+ ShapeOptionsT()
