

NativeTable

```
classDiagram
    class NativeTable {
    }
    class tfRangeOptionsT["tf::RangeOptionsT"] {
        + RangeOptionsT()
        + RangeOptionsT()
    }
    tfRangeOptionsT --|> NativeTable
```

The diagram illustrates a class hierarchy. At the top is the 'NativeTable' class, represented by a rectangle with three horizontal compartments. The top compartment contains the name 'NativeTable', while the two lower compartments are empty. Below it is the 'tf::RangeOptionsT' class, represented by a rectangle with three horizontal compartments. The top compartment contains the name 'tf::RangeOptionsT', the middle compartment is empty, and the bottom compartment contains two public methods: '+ RangeOptionsT()' and '+ RangeOptionsT()'. A blue arrow with an open triangular head points from the 'tf::RangeOptionsT' class to the 'NativeTable' class, indicating that 'tf::RangeOptionsT' inherits from 'NativeTable'.

tf::RangeOptionsT

+ RangeOptionsT()
+ RangeOptionsT()
