The diagram illustrates a class hierarchy. At the top is the 'NativeTable' class, represented by a rectangle with three horizontal compartments. The top compartment contains the class name. Below it are two empty compartments. At the bottom is the 'tf::BatchMatMulOptionsT' class, represented by a rectangle with three horizontal compartments. The top compartment contains the class name. The middle compartment contains a list of attributes: '+ adj_x', '+ adj_y', and '+ asymmetric_quantize_inputs'. The bottom compartment contains a list of methods: '+ BatchMatMulOptionsT()' and '+ BatchMatMulOptionsT()'. A blue arrow with an open triangular head points from the 'tf::BatchMatMulOptionsT' class to the 'NativeTable' class, indicating inheritance.
