

NativeTable

```
classDiagram
    class NativeTable {
    }
    class tfliteReducerOptionsT["tflite::ReducerOptionsT"] {
        +keep_dims
        +ReducerOptionsT()
        +ReducerOptionsT()
    }
    tfliteReducerOptionsT --|> NativeTable
```

The diagram illustrates a class hierarchy. At the top is the 'NativeTable' class, represented by a rectangle with three horizontal compartments. The top compartment contains the class name. Below it are two empty compartments. At the bottom is the 'tflite::ReducerOptionsT' class, represented by a rectangle with three horizontal compartments. The top compartment contains the class name, the middle compartment contains the attribute '+ keep_dims', and the bottom compartment contains two methods, '+ ReducerOptionsT()' and '+ ReducerOptionsT()'. A blue arrow with an open triangular head points from the 'tflite::ReducerOptionsT' class up to the 'NativeTable' class, indicating that 'tflite::ReducerOptionsT' inherits from 'NativeTable'.
