

NativeTable

```
classDiagram
    class NativeTable {
    }
    class tf_lite_HashtableFindOptionsT["tf-lite::HashtableFindOptionsT"] {
    }
    tf_lite_HashtableFindOptionsT --|> NativeTable
```

The diagram illustrates a class hierarchy. At the top is the 'NativeTable' class, represented by a rectangle with three horizontal compartments. The top compartment contains the text 'NativeTable', while the two lower compartments are empty. Below it is the 'tf-lite::HashtableFindOptionsT' class, represented by a rectangle with three horizontal compartments. The top compartment contains the text 'tf-lite::HashtableFindOptionsT', the middle compartment is empty, and the bottom compartment contains two lines of text: '+ HashtableFindOptionsT()' and '+ HashtableFindOptionsT()'. A blue arrow with an open triangular head points from the top edge of the 'tf-lite::HashtableFindOptionsT' class to the bottom edge of the 'NativeTable' class, indicating that 'tf-lite::HashtableFindOptionsT' inherits from 'NativeTable'.
