

NativeTable

```
classDiagram
    class NativeTable {
    }
    class tflite_ConcatenationOptionsT {
        +axis
        +fused_activation_function
        +ConcatenationOptionsT()
        +ConcatenationOptionsT()
    }
    tflite_ConcatenationOptionsT --|> NativeTable
```

The diagram illustrates a class hierarchy. At the top is the 'NativeTable' class, represented by a rectangle divided into three horizontal sections. The top section contains the class name, while the two bottom sections are empty. Below it is the 'tflite::ConcatenationOptionsT' class, represented by a rectangle divided into three horizontal sections. The top section contains the class name, the middle section contains two public attributes ('+ axis' and '+ fused_activation_function'), and the bottom section contains two public methods ('+ ConcatenationOptionsT()' and '+ ConcatenationOptionsT()'). A blue arrow with an open triangular head points from the top of the 'tflite::ConcatenationOptionsT' class to the bottom of the 'NativeTable' class, indicating that 'tflite::ConcatenationOptionsT' inherits from 'NativeTable'.

tflite::ConcatenationOptionsT
