

NativeTable

```
classDiagram
    class NativeTable {
    }
    class tflite_RankOptionsT["tflite::RankOptionsT"] {
        +RankOptionsT()
        +RankOptionsT()
    }
    tflite_RankOptionsT --|> NativeTable
```

The diagram illustrates a class hierarchy. At the top is the 'NativeTable' class, represented by a rectangle with three horizontal compartments. The top compartment contains the class name. Below it are two empty compartments. At the bottom is the 'tflite::RankOptionsT' class, represented by a shaded rectangle with three horizontal compartments. The top compartment contains the class name. The middle compartment is empty. The bottom compartment contains two public methods, both named '+ RankOptionsT()'. A blue arrow with an open triangular head points from the top of the 'tflite::RankOptionsT' class to the bottom of the 'NativeTable' class, indicating that 'tflite::RankOptionsT' inherits from 'NativeTable'.

tflite::RankOptionsT
