

NativeTable

```
classDiagram
    class NativeTable
    class tflite_SignatureDefT["tflite::SignatureDefT"] {
        + inputs
        + outputs
        + method_name
        + key
        + SignatureDefT()
        + SignatureDefT()
    }
    tflite_SignatureDefT --|> NativeTable
```

The diagram illustrates a class hierarchy. At the top is the 'NativeTable' class, represented by a rectangle with three horizontal compartments. The top compartment contains the class name. Below it is the 'tflite::SignatureDefT' class, represented by a rectangle with three horizontal compartments. The top compartment contains the class name. The middle compartment lists four attributes: '+ inputs', '+ outputs', '+ method\_name', and '+ key'. The bottom compartment lists two methods: '+ SignatureDefT()' and '+ SignatureDefT()'. A blue arrow with an open triangular head points from the 'tflite::SignatureDefT' class to the 'NativeTable' class, indicating inheritance.

tflite::SignatureDefT

+ inputs  
+ outputs  
+ method\_name  
+ key

+ SignatureDefT()  
+ SignatureDefT()
