

NativeTable

```
classDiagram
    class NativeTable {
    }
    class tflite_SliceOptionsT {
        + SliceOptionsT()
        + SliceOptionsT()
    }
    tflite_SliceOptionsT --|> NativeTable
```

The diagram illustrates a class hierarchy. At the top is the 'NativeTable' class, represented by a rectangle with three horizontal compartments. The top compartment contains the class name. Below it are two empty compartments. At the bottom is the 'tflite::SliceOptionsT' class, represented by a rectangle with three horizontal compartments. The top compartment contains the class name. The middle compartment is shaded gray and empty. The bottom compartment is shaded gray and contains two public methods, both named '+ SliceOptionsT()'. A blue arrow with an open triangular head points from the top of the 'tflite::SliceOptionsT' class to the bottom of the 'NativeTable' class, indicating that 'tflite::SliceOptionsT' inherits from 'NativeTable'.

tflite::SliceOptionsT

+ SliceOptionsT()
